SOCIETY

VISION
To be a dynamic world-class ICT Centre powering creativity and innovation in the University of Eswatini and the Country.

MISSION
To foster the development of innovative ideas and cultivate the culture of collaboration.

OBJECTIVES

- To provide innovative, quality and sustainable ICT solutions and services that meet the aspiration of the University and Country as whole.

- Be a bridge between lecturers and students, and other external entities.

- Sharpen students' skills, from what they learn in class to what they do extracurricular.

- To create a safe space for likeminded individuals to share and develop ideas.

- Organize and take part in events to help students make decisions in their careers.

- Introducing students to new and trending technologies.

- Give students the feel of real-time coding projects.

CORE VALUES

- **Excellence**: ICT society is committed to excellence in teaching, learning, research, engagement and support, and delivering quality in everything we do.

- **Inclusiveness**: The society shall encourage diversity in its members; exploring the branches of ICT.

- **Service**: The society shall take the effort to properly understand the needs of its members and stakeholders, and will be proactively responsive through the provision of solutions that meet the immediate and longer focus needs of its stakeholders

- **Innovation**: The society values agility, creativity and entrepreneurial activities that support the advancement of its members, university and the country.

- **Professionalism**: the society aims to foster accountability amongst its members, through adhering to the ICT laws and ethics.

- **Collaboration**: The society aims to encourage the culture of partnership within the students and with its various stakeholders.
